The NAOS Perspective

- The downgrade cycle for many businesses over the past 2-years should subside in February reporting season.
- We expect to see signs of earnings growth in emerging companies:
 - Cost initiatives often take 12 months to flow through to tangible earnings benefits.
 - Customers adjust to current trading environment and subsequent ordering cycle normalises.
 - M&A becomes attractive as vendor expectations adjust.
 - Pricing environment exhibits less volatility as the competitive landscape becomes more rational.

The NAOS Perspective

- The macro environment may prove beneficial for our investments:
 - A lower risk-free rate could lead to renewed investor demand for emerging companies.
 - Reducing and stabilising inflation allows businesses to more effectively manage costs.
 - A stable economic environment may encourage management teams to move forward on growth strategies, including M&A.
 - Increased consumer spending post one or more interest rate cuts.

Why Invest via a Listed Investment Company?

We strongly believe LICs are a highly effective structure to give investors the highest quality exposure to specific asset classes, which in the case of NAOS is emerging businesses.

A Listed Investment Company structure:

- Allows the investment manager to build a concentrated portfolio of high-quality investments **without needing to worry about short-term liquidity requirements**.
- **Fund size is generally limited** to the upside, allowing investors to maintain a significant exposure to the underlying investments and not be diluted by new investors, which may occur in an open-ended fund.
- Enables a **smoother distribution profile** as profits can be retained, as opposed to managed funds which distribute all taxable income annually. Dividends from a LIC may also be fully franked.
- Can provide **access to a range of alternative asset classes** which may not be suited to an open-ended structure.

NAOS ESG Framework

Considering ESG Factors in the NAOS Investment Process

At NAOS, as an investment manager, we recognise and accept our duty to act responsibly and in the best interests of all stakeholders. We believe that a high standard of business conduct and a responsible approach to environmental, social and governance (ESG) factors are associated with a sustainable business model over the longer term, which also benefits the broader economy.

We recognise the material impacts that ESG factors can have on investment returns and risk, and also the wider implications for achieving a positive social return.

Screening

NAOS excludes investment in specific industries and companies that do not align with our responsible investment goals, such as:

- Tobacco
- Gambling
- Nuclear & uranium
- Controversial weapons
- Coal mining operations, oil & gas production
- Animal cruelty

Due Diligence and Investment Decision

- Identify ESG factors we think are relevant to each proposed investment
- Consider our stance on these ESG factors, based on the principles and frameworks we believe can help to influence positive social return
- Integrate our findings into our broader investment process, which focuses on quantitative and qualitative analysis

Ownership and Monitoring

- With our long-term, concentrated investment approach, we are often a substantial shareholder in our investee companies and can meaningfully influence them to address identified ESG issues
- Creating accountability through ongoing monitoring and engagement with our investee companies

Our Guidelines

Our approach to considering ESG factors in our investment process is guided by:

Signatory of:

The Principles for Responsible Investment (UNPRI)

A globally recognised framework consisting of six principles that guide the incorporation of Environmental, Social and Governance (ESG) factors into investment analysis.

The United Nations Sustainable Development Goals (UNSDG)

A global framework that addresses sustainability challenges worldwide, offering 17 interconnected goals to achieve by 2030.

What Qualitative Information Sources Does NAOS Use?

The NAOS Investment Team undertakes fundamental analysis on potential and current investments. Some examples of our key focus areas include:

Reasons Why We Seek Board Representation

From time to time, we will seek Board representation where we believe some skillsets could be enhanced.

These individuals will generally have:

- Significant experience outside funds management including operational and M&A roles.
- A sound understanding and respect of shareholders capital.
- A track record of executing a strategy.
- Experience managing business risks.
- Experience in messaging/communications to market.

Reasons Not to Invest with NAOS

Our LICs are not for everyone. Some reasons why you may not choose to invest with NAOS include:

- Concentrated portfolios (0-15 investments & shareholdings often >20%)
- Long-term investment philosophy (5+ years)
- Focus on emerging companies (\$20 million - \$500 million market capitalisation)
- Benchmark unaware (no current NAOS investments are within the XSOAI)
- Industrial focus (no exposure to resources or very early-stage businesses)
- Smaller fund size (increases ability to gain a meaningful exposure to smaller businesses)
- ESG aware with a focus on positive impact
- LICs can often trade at discounts and premiums to their underlying net-asset backing
